

Feature Story

HUB INTERNATIONAL

HUB INSURANCE

After several interviews with various design - build teams, HUB Insurance recognized the value in Fusion Projects and knew they could rely on the expertise Fusion had to offer. With Fusions design partner, Square 1 interiors, a program was developed to determine the space requirement needs for HUB as it related to their business plans today and over the next several years. The project included consolidation of 3 locations including a retail center. Fusion worked with HUB analyzing various locations, doing pre lease plans and budgets that ultimately brought them to their new home in Willingdon Park.

Fusion Projects handled the entire process and delivered to HUB a beautifully designed, functional new office that is approximately 30,000 square feet which incorporated the use of modular walls and furniture systems. Fusion was able to deliver the project on time and exceed the expectation of the entire HUB project team.

RELOCATION

FUSION PROJECTS RELOCATING

Fusion Projects will be relocating this month - March 2014 to 850 West Hastings Street, Vancouver, BC. The team is excited to move to our new office space and we are currently in the midst of the design and build. Stay tune for more pictures as the space evolves.

History of the building - Credit Foncier Building - Architect: H.L.Stevens and Company - built in 1914.

Credit Foncier Franco-Canadian Company of Montreal chose this prominent location for its western headquarters in 1913. Fine materials, including granite, decorative terra cotta, and an elaborate copper cornice, are combined with the well-articulated base, middle, and top portions of the building to create this good example of Edwardian Commercial architecture.
